

# Who knew this kid would be the next big thing?

You did, because you understood your child's passion for all things cutting-edge. If your teen has an interest in math, science and technology, combined with a good work ethic and drive to succeed, he or she is the perfect candidate for Purdue Research Park's **Entrepreneurship Academy** from July 29 to August 3 on Purdue University's main campus in West Lafayette.

Eligible participants include high school juniors and seniors from 14 north central Indiana counties, including Cass, Clinton, Howard, Montgomery, Tippecanoe and White. Visit [www.prf.org/academy](http://www.prf.org/academy) **before the end of the school year**. Once you have downloaded the appropriate forms, have your child contact his or her math, science or technology teacher to submit the application.

For more information, contact Sascha Harrell at (765) 496-7221 or [smharrell@prf.org](mailto:smharrell@prf.org).
